ÖSTRA SÖRMLANDS FLYGGKLUBB

Club with a long history, an active community, passion, and great opportunities

Dating back to 1938

Östra Sörmlands Flygklubb, with origins dating back to 1938, has since its inception had both model, glider, and motor aviation in the same association. Today, we are one of the country's largest flying clubs with perhaps the most diversified aircraft fleet. There is the opportunity to fly gliders, motor- and seaplanes, all on the same airfield and in the same club.

At the airfield, we have several buildings, five of which are hangars. To facilitate the maintenance of our aircrafts, we also have a workshop and heated hangar.

In the clubhouse you will find a lounge, kitchen, and overnight accommodation for visiting pilots and members. The premises are managed by the club's non-profit members.

Tasks in firefighting

Many of our members get involved as home defense pilots within the Volunteer Air Force. As a contribution to society, our club has taken on the task of conducting fire watch patrol flights over the local area. Club members volunteer to patrol.

Thanks to this, we have been able to report land and forest fires to authorities at an early stage, limiting damage to property and nature.

We combine our passion for flying with a strong social responsibility and look forward to continuing to contribute to Sweden's safety and well-being.

Aircraft from Östra Sörmlands Flygklubb fire watch patrol scout, and detect, fires at an early stage.

ÖSTRA SÖRMLANDS FLYGGKLUBB

A club with a variety of aircraft types for everyone

Aircraft from Östra Sörmlands Flygklubb fire watch patrol scout, and detect, fires at an early stage.

Östra Sörmlands Flygklubb disposes of 13 aircraft. From gliders to seaplanes and several types of motor aircraft. As a pilot, this offers you the opportunity to try several types of flying and develop your skills.

ÖSTRA SÖRMLANDS FLYGGKLUBB

The path to a pilot's license often begins with a test flight

Are you curious about how it feels to fly or are you interested in getting a pilot's license? Then a test flight is a fantastic opportunity. We offer trial lessons in both gliders and motor planes.

Book a test flight on our website: osfk.se/en/testflight to fill in your details or send an email to provlektion.osfk@gmail.com and we will contact you to book a suitable time. We fly every weekend between May and September when the weather permits.

Give an appreciated experience away as a gift!

Do you know someone who loves flying, or just want to give away an experience? Give away a gift card/voucher from Östra Sörmlands Flygklubb

A seaplane rating/license gives you access to thousands of landing opportunities. Vängsö is well situated for seaplanes with many lakes surrounding the field and the proximity to the Stockholm and Trosa archipelagos.

Motorized aircraft is divided into ultralight aircraft with seating for two people and slightly larger aircraft with seating for four people. Fly longer distances, transport family and friends or travel for work? With a certificate for motor aviation, endless possibilities for fantastic experiences open. Combine benefit with pleasure.

Gliding is a sport for everyone, young as well as senior. For some, gliding means a moment of relaxation in the air in total freedom and silence. For others, it is a performance sport where full concentration is required for several hours while flying around a given course as fast as possible.

Globen

Clubhouse with kitchen and accommodation

Flight café / aviators' coffee shop / lounge

Various hangars that can also house your own aircraft

Play area (for kids)

Fuel facility

Parking space for your glider

Marine aviation

Space available for corporate events on the site

Two runways that provide many options in/for different wind directions

ESSZ - Väingsö airfield
5906.1 N 1712.7 E

Östra Sörmlands Flygklubb is a pleasant and diverse flying club with experienced teachers, youth activities and the opportunity for corporate events.

A diverse flying club like Östra Sörmlands Flygklubb does not just offer flying experiences for pilots and aviation enthusiasts. Our own youth events, as well as those in collaboration with other organizations, are organized here. We have experienced teachers in all disciplines such as motor, gliding and marine aviation.

There is aviation here for everyone. It is also possible to organize company events where you combine team building with flying. Some also choose to market their event at Östra Sörmlands Flygklubb on their social channels.

That is why we love our flight club!

A cornerstone in all clubs is that people help each other and contribute with voluntary commitment. It keeps costs down so we can fly more which is what we all want. Everyone in the club has a different background with experiences that will benefit everyone supporting each other on the board and in all club involvement.

Mats Skräder - secretary ÖSFK

The best thing about ÖSFK is that you can fly exactly when you feel like it or just take it easy on the ground, tinker with your own projects or hang out with friends who also rent rooms and stay in the evenings. Try it, come, and have dinner one evening in company / with friends at Vängsö and you will understand what I mean!

Alexander Koski - property manager ÖSFK

A good day as a field manager is when you see that the entire facility is utilized / used to its maximum, the planes fly / are airborne, the parking lot is full, and the club gets back the hours we all put in to get/enjoy a great field.

Anders Olsson - field manager ÖSFK

ÖSFK offers many opportunities. For example, finding a hangar for my airplane. In addition, I appreciate the runways, which make it easier for a beginner to be able to choose a course based on the wind. Finally, it weighed in that I also wanted to be able to obtain a rating for marine aviation. Here at the club, the plane, lake, and teachers are all in one place. Great!

David Nilsson - member/pilot ÖSFK

Welcome to visit us at Vängsö!

BY AIRPLANE

Runways 15/33 and 03/21. During the months of October to May, the condition of the runways and visibility may change quickly resulting in them being closed for traffic. For PPR and current airport information, field status, etc., visit osfk.se/en/visitvaengsoe

Traffic altitude 1000 feet. During a large part of the year, gliders are flown daily, so a lot of traffic in the area is not unusual. It is possible to refuel 91/96 UL on request

BY CAR

The fastest route by car from Stockholm is the E4 to the south. Take the exit at Järna and continue towards Gnesta. Pass through Gnesta and take Mariefredsvägen towards Vängsö. There is plenty of parking space at the club.

PUBLIC TRANSPORT

(COMMUTER TRAIN / BUS)

From Gnesta station you can also take bus 543 which stops at Laxnevägen. After a short walk down the road you arrive at our site.

VIRTUAL VISIT IN THE SIMULATOR: Download Vängsö ESSZ to the Microsoft Flight Simulator 2020 (MSFS) and X-plane 11/12 (XP12).
